	5mm	0.5	5.65 USD	200
		0.6	6.54 USD	200
	10mm	0.5	9.97 USD	100
		0.6	11.9 USD	100
	20mm	0.5	19.5 USD	100
		0.6	23.5 USD	100

PVC LAMINATED BOARD

PRODUCT INTRODUCTION

Thickness:5–25mm, Customizable As Needed

Density:0.4–0.7g/cm³, Customizable As Needed

Size:1220*2440/2800/2900/3000mm, Length Customizable As Needed

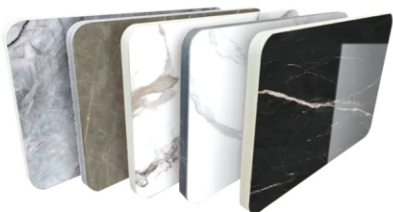

Packing:PE Bag/ Carton Box/Pallet, Customizable As Needed

FEATURE AND ADVANTAGE

PVC Laminated Board is a kind of fireproof, waterproof, paint-free and environmentally friendly decoration material, which is formed by PVC foam board as the base material and used PUR hot melt adhesive to laminate PVC film or PET film on the surface. It has diversity designs, such as wood/marble/fabric/metal color selections. Meanwhile, it's easy to install and very popular in interior decoration.

APPLICATION AREA

Widely applied in Bathroom Cabinets, Kitchen Cabinets, Toilet Partition and Wall Decoration Panels, etc.

PVC CO-EXTRUSION BOARD

PRODUCT INTRODUCTION

Thickness:8–18mm, Customizable As Needed

Density:0.55–0.7g/cm³, Customizable As Needed

Size:1220*2440mm, Customizable As Needed

Color:White,Black,Yellow,Red,Blue,Green,etc. Customizable As Needed

Packing:PE Bag/ Carton Box/Pallet, Customizable As Needed

FEATURE AND ADVANTAGE

PVC Co-Extrusion Board is using the co-extrusion production process, which forms a sandwich board structure. It makes the product have smoother surface, stronger hardness and easy to nail, cut and process. At the same time, it also reserve the advantages on waterproof, flame retardant and lightweight. So, it has given great performance in a wide variety of application areas.
